Awnings That Think

Motorized and Automatic Awning Systems

HOME
MOTION BY

somfy

Enjoy your deck or patio more
often with automated retractable
awnings... and let Somfy take control.

Radio Technology Somfy® (RTS): Exclusive Somfy technology dedicated to your comfort

Somfy, the world's leading manufacturer of tubular motors, has more than three decades experience in designing and manufacturing motors and controls, making Radio Technology Somfy® (RTS) the ultimate choice for automation of retractable awnings and exterior screens.

Radio Technology Somfy® (RTS) offers a high performance, convenient and reliable solution for awning and screen automation, eliminating the need for wiring between the motor and controls. With the radio receiver integrated within the motor, RTS is the ideal choice because installation is quick and easy.

Whether you want to control your awning or screen at the touch of a button or use automatic controls, Somfy has the solution. It's so easy, It's Somfy!

Telis RTS Collection

Somfy's Telis RTS transmitters feature Radio Technology Somfy® (RTS) and offer push button control of your retractable awning or exterior screens. The Telis RTS collection is available in single channel, five channel and Soliris versions in four unique finishes, with a streamline shape and rubber edging for increased durability.

For the ultimate control, Somfy now offers the Telis 16 channel remote and the Impresario Multi-channel timer. Both transmitters feature on-screen displays for simple programming and unique personalization abilities. Please call for availability.

Convenience and Simplicity

Combining high-performance technology with practical features, Somfy RTS sensors and controls power your awning or screen to respond to the weather in a dependable and effortless manner making it easier for you to use your retractable awning or exterior screen.

DecoFlex Single to 5 channel WireFree™ RTS wall switch available with customized labelling options.

Easily convert a DecoFlex WireFree™ RTS wall switch to a table top control with a table top accessory.

Eolis 3D WireFree™ Sensor

is a wireless, battery powered wind sensor that will automatically retract the awning when it detects wind generated movements.

RTS Infrared Heater

is a weather-proof infrared heater with built-in RTS that can be controlled using the same switch or remote as your motorized awning.

Sunis WireFree™ RTS Sun Sensor

is a wireless, sun sensor that is powered with an integrated solar cell and uses RTS to automatically extend an awning based on the sun's intensity.

Soliris RTS Sensor 24V

is a combined sun and wind sensor that will lower the screen automatically when the sun shines and will raise the screen with the detection of wind.

Home Motion by Somfy®

Automated awnings and exterior screens transform your deck, patio or backyard into extra living space. Shade or sun... You decide what you want and when you want it.

Please look for a retail dealer in your area that is recognized as a Somfy Expert. They are trained specialists who are committed to providing you with quality Somfy motors and controls and service.
