

DROP SHADES

Patio-Pro Drop Shade

The Patio-Pro drop shade system is Accent's original drop shade allowing widths up to 25 feet and heights up to 15 feet. While many upgrades have been made since its original inception in 1979, this system remains unique in its ability to be installed on inconsistent surfaces such as lattice overhangs, slanted fascia and even under eaves. This system is unlike Accent's other box and track drop shade systems.

-  Sunbrella-certified Fabric
-  10-year Fabric Warranty
-  100+ Solid and Stripes
-  5-year Motor/Electronic Warranty

Economical and Sleek

Traveling along vertical, stainless-steel guide wires, the Patio-Pro's roller tube moves vertically to provide excellent protection against heat, solar damage and inclement weather while also providing a sense of privacy. For safety, the shade is secured by a weighted bottom bar.

Uniqueness

Unlike a box and track system, the Patio-Pro can be mounted onto inconsistent surfaces such as rock, brick, slanted fascia and under eaves. Stainless-steel fittings and Accent quality installation guarantees long lasting sun protection.

PATIO-PRO
